The **Crypto Boom** is a pearl version of the original Crypto but now features the new HK22. This cover is setting a new standard by which all coverstocks are being measured. With the addition of the HK22 cover, the **Crypto Boom** offers a complimentary ball motion to the original Crypto with a clean projection through the front part of the lane, and a sharper continuous down-lane motion. The **Crypto Boom** uses the same core as the original Crypto, with a RG of 2.481 and a DIFF of 0.046.
